

[TECHNICAL RIDER]

ALTROY JEROME

- Technics 1210 MK2-MK7 turntables (x 2) w/cartridge & stylus required..
- Mixing console: Pioneer DJ DJM-V10 / Pioneer DJ DJM-750MK2
- Pioneer CDJ 3000 / Pioneer XDJ 1000 (x 2)

NOTE: monitors must be in stereo & controlled from the dj mixing console: required!

BOOTH SPECIFICATIONS:

NOTE: The following specification guideline is simply a reference and does not have to be followed exactly. However, all effort should be made to ensure that the booth is as close to the specifications as reasonably possible.

Turntables:

Turntables must be appropriately decoupled to prevent extraneous vibration and skipping. The **turntables**, **mixer** and **records**) must be visible to the audience throughout the performance.

NOTE: No suspension systems (e.g. elastics, chains) can be used. Turntables must always be oriented forward: tone-arm and pitch control to the right, not at the back.

Decoupling:

Recommendation: decouple each turntable with one concrete patio stone underneath.

Monitors:

- Pair of powerful monitors, preferably 2-way with 15-inch LF speaker
- Monitors must be on stands on each side or wedge monitors elevated 50 cm from the floor
- Monitors must be no more than 150 cm apart
- Monitors must be controlled from the DJ Mixer
- Monitors must be equalized, using a standard 1/3 Octave EQ

Table / Dimensions:

(1x) W 80cm / L 200cm / H 80cm (no lower in height than 80cm . no higher than 110cm)

***Hybrid dj/live setup only: ADD TABLE (1x) W 80cm / L 80cm / H 80cm**

Record Table \ Shelf \ Bin:

Booth must contain a shelf, table or bin to the rear middle of the booth for records. Dimensions: W: 40cm : L: 80cm : H : 80cm with appropriate lighting
